### ***FACT SHEET: State-Supported Biofuels Plants in Indiana***

The Daniels/Skillman Administration is committed to the use of biofuels. Ethanol and biodiesel burn cleaner, reduce the state's dependence on foreign sources of energy and increase the economic opportunities for Hoosiers.

Indiana is proud of the rapid success we have had in biofuels production. In January 2005, Indiana had only one ethanol plant, even though it is the fifth largest corn state. In fact, it seems every region of the state is proposing one if not several ethanol plants.

While many ethanol plants have been discussed in communities and the media, ISDA has compiled a list of ethanol plants which received substantial incentives from the state since 2005. The 12 ethanol plants listed below would produce more than 1 billion gallons of ethanol annually and use approximately 380 million bushels of corn annually.

<b>New ethanol plants</b>	<b>Town/County</b>	<b>Corn needed in millions of bushels</b>	<b>Estimated production level in million gallons</b>
Putnam Ethanol	Cloverdale/Putnam	22.22	60
ASAlliances Biofuels LLC**	Linden/Montgomery	37.04	100
Iroquois BioEnergy**	Rensselaer/Jasper	14.81	40
Central Indiana Ethanol**	Marion/Grant	14.81	40
The Andersons**	Clymers/Cass	40.01	110
Rush Renewable Energy	Rushville/Rush	22.22	60
Central States Enterprises Inc.	Montpelier/Blackford	40.01	110
ASAlliances Biofuels LLC	Tipton/Tipton	37.04	100
Cardinal Ethanol	Harrisville/Randolph	37.04	100
Premier Ethanol LLC**	Portland/Jay	42.00	120
Hartford City Bio-energy, LLC	Hartford City/Blackford	32.59	88
Indiana Bio-Energy	Bluffton/Wells	37.04	100

\*\*These five plants are expected to be producing ethanol in 2007.

Indiana is the fourth largest soybean state, but it had no biodiesel plants in 2005. Now it has four biodiesel plants operating or under construction, expected to produce a total of 100 million gallons of biodiesel.

<b>New biodiesel plants</b>	<b>Town/County</b>	<b>Soybeans needed in millions of bushels</b>	<b>Estimated production level in million gallons</b>
Integrity Bio-Diesel	Morristown/Shelby	3.3	5
Evergreen Renewables	Hammond/Lake	3.3	5
Louis Dreyfus	Claypool/Kosciusko	50	80
E-biofuels	Middletown/Henry	6.25	10

The 12 new ethanol plants and four new biodiesel plants will create 620 new jobs for Hoosier workers. In total, they will put at least \$29.5 million into local farmer pockets and invest more than \$1.47 billion in capital expenses.

In January 2005, there were no public E85 pumps and it was difficult to find a public biodiesel pump. Today, it's a different story, with more than 60 E85 public pumps and numerous biodiesel pumps. To find a biofuels pump close to home, visit Indiana's biofuels website at [www.biofuelsindiana.com](http://www.biofuelsindiana.com).
